Safety Info & House Rules

COVID-19 Special Notice

Please refrain from taking a walk in the village **for two weeks after your arrival** in Amami Oshima.

match guest house is open and welcoming you. Health and safety of you and people in the village is always our primary concern. We will be wearing masks, and you will be required to wear a mask in public. Local health authorities have requested us to have a screening procedure that may include temperature checking.

If you feel sick during your stay, please contact us immediately. Then, stay home to rest and avoid going out into public places.

We continue to monitor the situation of COVID-19 closely and are following the direction of local health authorities.

- Take off your shoes at the entrance and just relax with bare foot in the house.
- Smoking is not allowed in the house. Please tell the property manager on your arrival if you smoke, so we will set up an ash bin next to trash bins in the backyard. Remember to keep certain amount of water in the ash bin for safety, and to keep the area clean.
- Quiet hours are after 9 p.m. As the house is in quiet neighborhood surrounded by mountains, loud and rowdy voices/music echo through the village. Please do not prevent people in the village from getting a good sleep.

- To use hot water in shower/kitchen sink, turn on the hot water heater switch on the kitchen wall. Please turn off after use.

- A portable night light can be found on the wall by the sofa. Just unplug it and plug into any room's outlet you want. It will be automatically turned on when the room gets dark.

- How to open windows

Unlock the windows before opening.

Finally, turn the handle - clockwise.

- We provide consumable supplies enough for a week stay. When any of them run out, please refill them yourself. Housekeeping service is available once per week after a week stay. Our property manager will do a quick clean, replace linens, and refill the supplies once a week. If you do not need this weekly quick clean, let us know on your arrival. In that case, please refill the supplies yourself.
- Alarm will go off if smoke/gas detectors sense an extreme heat or smoke in the kitchen. Please call us immediately in that case.

Garbage & Waste Sorting

- Tatsugo town has strict rules to throw garbage (and waste). Do not hesitate to ask us how to sort garbage.

Non-burnable /incombustible	Batteries, metals, ceramics, glass items, cans, etc.
burnable /combustible	Other than the above: paper, plastic bottles, plastic containers and packaging, kitchen waste, and so on.

- The trash can inside the house is specifically for burnable/combustible items. When it gets full, please throw it to a trash bin (yellow trash bag) in the backyard. You can find a new plastic bag under the kitchen sink to replace.
- There is no trash can for non-burnable /incombustible items such as cans inside the house. Please throw those items directly the trash bin (blue trash bag) in the backyard.

Kitchen Garbage

- There is **no garbage disposer**. Please **do not** throw food debris directly to the kitchen drain.
- You will find small mesh bags under the sink. Use it to catch food debris in a shallow basket of a drain opening.
- You can also use the mesh bag with a waste bag holder. The holder can be found under the sink as well.

- To prevent food debris from smelling in summer, (1) wrap food debris/the mesh bag in newspaper, (2) put it in a small plastic bag, and (3) throw it to the trash bin (yellow trash bag) in the backyard. You can find newspaper under the sink. *Newspaper can absorb moistures so that germs do not germinate, and that smells are reduced.

- Please use the sink outside to remove scales and guts of fish.

Kitchen

- Dish rack is not available. You can use a dish drying mat hung next to the fridge. Just place dishes on it after you wash them. A dish towel (to dry dishes) and a kitchen cloth (to wipe table) are also hung on the same towel bars.

- Please help yourself to use sugar and salt. Sugar is on the fridge, and salt is in the fridge. You may need to purchase additional seasoning/condiment such as soy sauce if necessary.

- A fire extinguisher is in the kitchen. Please read an instruction placed in the house so that you can use it instantly when you need it. Do not play with it when you do not need it.

Bathroom

- Please mind your head when you use the bathroom sink. Especially when you wash your face, pay attention to the shelf.
- Because of the climate of Amami Oshima characterized by high temperatures and high humidity, mold and mildew grow fast and easily if you keep bathroom (and kitchen as well) wet and/or unsanitary. We truly appreciate your cooperation to keep the bathroom clean by proper ventilation:
 - ✓ Keep the shower room exhaust fan turned on during your stay.
 - ✓ keep the washing machine lid open after every load of wash, so moisture can escape. It is essential to prevent mildew growth in washing machine tub.
 - ✓ Put the bathmat back to the holder after a shower.

- Please place **laundry items inside mesh laundry bags** for a load of laundry to prevents them from getting damaged.
- A laundry line is stretched across the bathroom walls. If you want to retract it,

follow the instruction backwards.

- ✓ Maximum load is 10kg/22lb.
 - ✓ Do not unhook the tab while laundry is still hanging on the line.
 - ✓ Do not use it for anything other than laundry.
- This rack is placed on the wall by the shower door. Just pull down the cover and hang towels.

- We only have an electronic toilet. In a power outage it does not flush, so you need to manually flush with using a bucket of water. The bucket is found under the bathroom sink. Please call us for any help.

<HOW TO FLUSH IN A POWER OUTAGE>

1. Unplug the socket

2. Take off the cover from the right side of the body.

- If the house key is lost or stolen, you will be charged for the total replacement costs.

Advice for Tatsugo Life

- Beware of Habu! It's a nocturnal poisonous snake (1-2m/3-6ft) living on Amami Oshima. Habus are highly active at night and stay in shade and shelter during the day. They are also good climbers and swimmers. For night out, always carry a flashlight with you to pay attention to your steps. As they can feel heat radiated from you, do not get closer to or enter bush area day or night. If you encounter a Habu, just stay away from them.

- Yamori, literally means "house protector" in Japanese, are geckos commonly found in and outside houses on Amami Oshima. They are beneficial to us by eating unwanted bugs around the house. Please don't be surprised by their chirping or clicking noise. Yes, they cry!

- When conditions such as high humidity are met in early summer or early fall, swarms of ants and termites fly out to bright lights at sunset. To avoid them from entering to the house, please make sure to close the window curtains, turn on air conditioners instead of opening windows.

← swarms of winged bug in early fall

- The climate in Amami Oshima is unstable and characterized by high temperatures and high humidity. The weather changes suddenly throughout a day. For example, heavy rains after beautiful sunny morning are very common.

How to enjoy the village of Tatsugo

Please refrain from taking a walk for two weeks after your arrival in Amami Oshima.

Take a walk

As the village is surrounded by Tatsugo forests and a bay called "Tatsugo wan", you will easily find paths leading down to the bay. Or you will come across other paths with line of happiness trees and banyan trees, respectively called "Fukugi" and "Gajumaru" in Japanese. Just let yourself get lost and explore in a maze of narrow streets and tiny alleys running across the village.

A handmade driveway mirror, a catholic church, a rest area by a vending machine.

Very rare traditional coral stonewalls, a banana tree on river side, papaya tree.

Colorful flowers and tropical fruits on gardens will amuse you

Giant banyan trees and huge plants grow thickly everywhere. It is very nice to cool off in the shade of trees in summer.

Feel history

Tomb with Buddha statue

A mysterious buddha statue sits peacefully in the back of the Tatsugo village. It is actually a tomb, engraved with the year of 1725 and believed to be built for a historical person in the 10th or closer generation of the Kasari clan. Tatsugo town has designated it as a cultural property.

Nanshu Saigo's Former Residence Site

Nanshu Saigo, a.k.a. Takamori Saigo, is an important figure in Japan's history. He spent some time with his wife Aikana at this residence. If you are lucky, descendants of Aikana will take you to the residence tour.

Admission fee: JPN200 for adults, JPN100 for junior/high school students

Enjoy fishing, driving, and diving

Just take a fishing rod and go down to a harbor for fishing all day long. An alternate is to take a short road trip to find scenery of the Tatsugo village and Tatsugo bay spreading below your eyes. Or stop by a diving shop in the village to explore the ocean.

Another fun part comes after dusk. Prepare the fish you caught and barbeque them in the **match guest house** front yard!

Find unique sceneries

'Noribari' is one of the Oshima Tsumugi silk manufacturing process. It's to apply starch made from 'igisu' seaweed to 'kasuri' silk threads. Threads are dried up in the sun so that they won't get tangled. Nowadays only several artisans inherit the 'noribari' skills. If you are lucky, you find the artisans doing 'noribari' in the village. It's always a sunny day if you find such scenery.

The elementary schoolyard next to match guest house is where people gather. Some practice 'ground golf' in the evening. Children play baseball on weekends. As temperature goes down in fall, people become enthusiastic about sports. A sumo tournament for kids is held in the schoolyard. A sports day is held also once a year, so children spend some time to practice for it.

Bus does not come that often but still very important public transportation for school commuting. Those two bus stops in the village will give you a feeling of staying in the countryside. Even if a next bus won't come in a few hours, you might want to take a seat and have a nice chat with your friends.

The village cemetery, located in the best place to view the ocean, gets full of various fresh flowers twice a month. People in Amami Oshima traditionally visit family grave on the first and the 15th day of each month on the lunar calendar.

The other traditional events are Hamakudari (procession to the sea) in the end of June, celebration of the respect for the aged in September, a sports day and Taneoroshi in October. In addition to these yearly events, there is a monthly village-wide cleanup. Once you get closer to people in the village, they might invite you to those events.

The most significant event is Taneoroshi to be held on the 4th Friday and Saturday in October. It's to pray for a good harvest in the next year. People used to go door to door through the village and dance all night. These days we leave a community center, first visit new houses, and then travel each of 6 divided areas of the Tatsugo village in two days.

Meet local people

Probably you won't see local residents of the village that often even though you stay at match guest house for weeks. On weekdays, young people go to work. Older adults also go to fields to grow vegetables and fruits, or other times they take care of the garden thoroughly. If you start to miss talking to someone, it will be fun to stop by these shops in the village to have some chats while shopping.

Shimura Store opens 7 days a week from 7:00AM to 07:00PM. It's a huge relief that we can go grocery shopping anytime. In the evening, the shop is full of people back from work.

Aikana is a shop of local specialties, running by a local women's group. It opens every day except Thursday. The store is the center of the village's information. You will find raw sugar sweets, pickled papaya and local vegetables, local fruits jam, and on and on. They go well with your tea time at match guest house.

Why don't you make friends in the village, so they might share with you how to enjoy living in the village such as fishing. They might teach you local cooking or let you pick 'tankan' citrus fruits in their garden. We bet you will love such great experiences, which you cannot have in a typical sightseeing tour. Moreover, you could find a house or a land to start a new life in Amami Oshima.

Transportation

Not only in a typhoon but also in a rainy season and winter, the low clouds hang over the ocean, and the wave gets high. In such a bad weather, flights and ferries will be canceled. Please keep confirming your flight/ferry operation status in such bad weather. Especially ferry companies won't make a direct contact with you even if your ferry is canceled or won't stop at Amami Oshima.
