If you have any problems, please call Mori at 090-3440-8224.

[Island Living Advice]

- Amami Oshima is home to poisonous snakes. They are nocturnal and react to threats. Please make sure to carry a flashlight when you go out at night, and make sure to avoid grassy areas.

- There may be geckos inside the house. They are reptiles that eat pests and are beneficial creatures

that protect the house. If you see one, please leave it alone. They make high-pitched noises that can sound either like, “*kyu*” or “*kekeke,*” so please don’t be startled.

- When using the air conditioner, please keep it running at a constant temperature of 27–28° C.
- The weather on the island is hot, humid, and unstable. Sunny, cloudy and rainy weather alternates rapidly throughout the day. Even if it is sunny in the morning, it’s common for it to rain heavily in the afternoon. Only hang the futon out to dry when you are at home. The clothesline outside will not get wet unless there is heavy, sideways rain.
- When the humidity is high, direct a fan at the laundry or place a dehumidifier under it to help it dry faster. If the bathroom or kitchen area are unsanitary or constantly wet, mold is more likely to grow. Please pay attention to proper cleaning and ventilation.
- The seasonings we always have on hand are salt and sugar. They are stored in the refrigerator. If you need any other seasonings, please purchase them yourself.

- There are no city banks on the island, and many stores do not accept credit cards. Please use the ATMs listed below.
